

2022 TMSOD Competition Make-Up Instructions

Below you will find step-by-step instructions on how to apply competition make-up.

Things you will need to get started:

Eyeshadow Palette and Brushes	Eyeliner	Mascara
Eyelashes	Eyelash Glue	Foundation
Powder	Lipcolor	Blush
Eyelash Curler *optional	Bronzer *optional	Lip Gloss

Step 1: Foundation and Powder

Even if a performer has flawless skin, they should wear foundation and powder. Stage lights make bare skin appear washed out.

1. Apply foundation with a sponge over the entire face. Blend well into the neck and all the way to the sides of the face.
2. Blot powder on top.
3. *Optional: Lightly apply bronzer to cheeks, forehead, nose, and chin. Blend so there are not unnatural lines.

Step 2: Eye Shadow

1. Cover the entire eyelid and brow bone with the lightest shade of brown.
2. Using the medium shade of brown, apply the shadow to the crease of the eyelid.
3. Be sure to blend the line where the two shadows meet.
4. Using the darkest brown, apply the shadow to the outer corner of the eyelid upward towards the eyebrow.
5. Lightly blend shadow lines.
6. White eyeshadow is used to highlight and accent the eyes. It should be applied above the brown shadows, closest to the eyebrows, as well as on the inner corner of the eyelid near the tear duct.

Step 3: Eye Liner and Mascara

1. Apply a nice evel line across the upper and lower lash.
2. The lower line should be thinner and swept up and out to a point. Be sure to pull the skin tight before bringing the eyeliner to a point.
3. Apply one coat of black mascara to the upper and lower lashes before applying fake lashes.
4. *Optional - curling natural lashes (with an eyelash curler) aids in the application of fake eyelashes. The goal is to make both (natural and fake) look like they are one.

Step 4: Eyelashes

1. Kiss Looks So Natural Lash “Flirty”
2. Measure eyelashes to make sure it fits the eye and is not too long horizontally. If necessary, cut a few lashes off of the end with the longer lashes so that it fits the eyelid.
3. Apply a line of glue to fake lashes. When applying lashes of the eye, keep eye closed and make sure the longer lash side is on the outer part of the eye.
 - * glue may look messy at first, but it will dry clear
 - * do not reuse a pair of fake eyelashes for than 2-3 times
4. You can apply a light coat of mascara and curl the natural and false lashes together at this point. This will help make the lashes look more natural.
5. Use eyeliner and apply to the lash line again, over the fake eyelashes, creating a nice finish.

Step 5: Blush

1. Apply blush in an upward motion along the cheekbone. Remember that it may look bright under regular lights, but barely show up under stage lights.

Step 6: Lip Color

1. Apply lip color over lips.
2. Allow to dry and apply another coat if needed, blot.
3. Allow color to dry completely and apply gloss over top of color.
